

With our best Season's Greetings
2009

Grintec MatchRace 2009

This year GRAINTEC will support the Danish organization BØRNEfonden.

We are proud to be able to sponsor a project that will make a difference to children and young people in terms of knowledge and education – values that are also appreciated in GRAINTEC.

GRAINTEC A/S

Knowledge is the world's most important resource

The project in Togo in West Africa covers teaching materials for 9 schools and audio visual equipment and books for a library. Teaching in schools is free, there are many pupils in the classes and books and school materials are scarce.

The project will give the children a chance to get an education and thus the foundation for a better life.

Follow the project on www.graintec.com/project-togo/

BØRNEfonden's mission is "to help children in poor countries grow up to become healthy, well-educated, independent adults and supports them and their parents in creating their own basis of living and developing their local community in a sustainable way" www.bornefonden.dk
